RESTful WebServices

English

Suleman Khan

Software Engineer | Team Lead | FullStack | Angular | Typescript |
Javascript | NodeJs | NestJs | RESTful APIs | Graphql | Ai | SaaS |
AWS | GCP | Remote

Karachi Division, Sindh, Pakistan

Summary

Invision Custom Solutions Inc. is where I apply my unique technical
expertise and strong communication skills as a senior software
engineer. I focus on delivering complex solutions using Angular,
NestJS, and Postgres, Mysql, and deploying them on AWS or GCP
cloud platforms. I have extensive experience in building innovative,
efficient, and scalable products for various clients and industries,
such as fintech, e-commerce, and education.

I graduated with a bachelor's degree in computer science
from MAJU in 2021, where I learned the fundamentals of web
development, programming languages, data structures, algorithms,
and software engineering. I am passionate about delivering high-
quality software and constantly learning new technologies and
best practices. I am highly motivated and dedicated, and I work
well independently and as part of a team. I am also experienced in
remote work and have a proven track record of delivering results in
fast-paced, deadline-driven environments.
